

April 5, 2010

Chuck Pechin has been providing sports physical therapy for my family for over 10 years. My children who are now 20 and 17 years old were avid, dedicated athletes. Playing year round sports would lead to injuries and many strained muscles. Chuck is a "Miracle Worker". He is incredibly knowledgeable about the anatomy of the body and how to visually ascertain imbalances. Treatments are usually only once with good advice as to if and when to return to the playing field. In one session you leave his office feeling cured and restored. There is no cracking like chiropractors perform. The Deep Tissue Muscle vibrator performs most of the work on achy muscles. It is simply amazing.

I have been treated by Chuck myself. My children and I have spent long term care at Bauer Physical Therapy and Pro Sport Physical Therapy. In addition we have sought ongoing chiropractic care. Week after week you would go at least twice a week and the problem might get better, but typically returned. Chuck Pechin's methods work instantly and you wonder why you didn't come in sooner.

Personally, I have recommended Chuck to at least 50 people from adults to children and high school athletes. They can't thank me enough and then they go on to recommend Chuck. The proof of his ability to help injuries and achy muscles is in the number of people that seek his expertise. He is professional and compassionate. My daughter Lexi who now suffers from 2 autoimmune diseases, Scleroderma and Juvenile Dermatomyositis has sought care from Chuck for these chronic diseases that cause her a great deal of pain. One treatment and she is good to go for months. He has personally been there and was so caring because of how sick she was. My daughter knows what a special person Chuck is.

I have total confidence in Chuck Pechin. As I stated previously, he is a "Miracle Worker".

Sincerely yours,

Melinda Pettit
