

I would be honored to comment on how Chuck Pechin and his colleagues have had a hand in healing my family. Three out of the four people in our family have benefited from Chuck's services. I have been enduring ankle pain for two years now. Chuck has worked on me on and off for over a year now. His vast knowledge, expertise and affordability has allowed me to visit him multiple times a week

My husband found himself with extreme back pain and basically couldn't get out of bed without being bent over. He went to a chiropractor, acupuncturist and a medical doctor. They all claimed that they could help and none of them did. I begged my husband to give Chuck a try. He was amazed how much just one visit helped him walk straighter. He continued with treatment for a couple of weeks and he was thrilled at the success Chuck's services afforded him. He is now a believer!

Finally, I have a very athletic son who is 14 years old. He had been having chronic elbow pain for almost two years. We took him finally to a "well known" orthopedic doctor in Newport Beach. He was referred from a friend and they said he would find the problem. After taking an MRI of his elbow, the doctor couldn't see any reason why my son was having the pain. He diagnosed him with "little leaguers arm." So, we took a break from sports for 6 weeks and just allowed his arm to rest. Once the break was over, he went back to football and baseball. Once again, the pain returned. I finally said, let's see if Chuck can do some more magic on my son. In one visit, Chuck figured out that he had a nerve being pinched in his elbow. He found a muscle impingement in his elbow and provided treatment by massaging the elbow area. Finally, we found someone that knew what needed to be done on this strange sports injury. Now we continue to see Chuck on a regular basis to make sure the elbow bone stays in place.

All in all, Chuck has been a lifesaver for our family. He provides an unbelievable service that is affordable, attainable and his knowledge of the body and how it works is unmatched. He understands sports injuries like no one else that I know.

I truly believe that many of our injuries would of not healed so fast if we didn't have Chuck to lean on. If I would trust him with my children, I would feel safe recommending him to anyone I know who is facing either a sports injury or a chronic pain issue.

Thank you Chuck for being the one place we can go to ease our pain and provide a service that we couldn't get or afford anywhere else!
